表紙写真の説明：諏訪神社の神紋

カジノキ *Broussonetia papyrifera* の葉は上古、神前に奉る供物を盛る器に用いられたばかりではなく、葉の繊維は和紙の原料となり、幣帛として神事に使用されてきたことから、諏訪神社（長野県諏訪市）に奉仕する神官の家紋となり、それが神社の神紋に定着した。この図形は根・茎・葉を組み合わせたもので、特に“諏訪梶紋”と言われる。

## Instruction to Authors

- 1 . "The Journal of Phytogeography and Taxonomy" publishes original papers and short communications in Japanese or foreign languages concerning various fields of botanical sciences, such as phytogeography, plant taxonomy, biosystematics, plant ecology (preferably phytosociology), and palaeobotany. It is recommended that contributors have membership in the Society.
- 2 . The manuscript should be sent to the editor-in-chief : Editorial Committee, Department of Biology, Faculty of Science, Kanazawa University, Kanazawa 920-11, Japan.
- 3 . The sequence of material in manuscript submitted should be : author's name, title of the paper, abstract (in English, limited in length to 250 words), a list of English key words (up to 5 words), the main text (introduction, materials and methods, results or observations, and discussion), and references. The papers written in foreign language must accompany a Japanese summary.
- 4 . Original papers must not normally exceed 6 printed pages, including figures and tables. Extra charges (6,000 yen per page) will be asked for those exceeding 6 printed pages. Coloured illustrations can be published only if the additional cost is borne by the author. Short communications should not comprise more than 2 printed pages.
- 5 . Papers submitted must contain important, new, unpublished material elsewhere. They are expected to be written in concise form. The title should be brief and characterize the main contents of the paper. The full names of the authors, the institute where the paper originated, and the exact address to which proofs should be sent must be given in the first page of the manuscript.
- 6 . The manuscript should be typewritten in double space with a broad margin and submitted in triplicate for review purpose. Metric units must be used. Legends of the illustrations and plates should be typewritten on a separate sheet.
- 7 . Literature references should be listed at the end of the paper in alphabetical order under the first author's name. The following examples of presentation refer to (a) journal articles, (b) extracts from collective works, and (c) books :
  - (a) Sagisaka, S. and Anderson, E. 1965. Segmental interchanges of *Tradescantia*. J. Heredity 18 : 41 -92.
  - (b) Stebbins, G. L. 1972. Ecological distribution of centers of major adaptive radiation in Angiosperms. In : Valentine, D. H. (Ed.) : Taxonomy, Phytogeography and Evolution, pp. 7-38. Academic Press, London.
  - (c) Wettstein, R. 1935. Plant Geography. 540 pp. Springer-Verlag, Berlin.
- 8 . For each paper 50 offprints are supplied free of charge. Additional copies may be ordered at cost price : this must be done at the time when galley proofs are returned to the publisher.

**Journal of Phytogeography and Taxonomy** is published twice a year by the Society for the Study of Phytogeography and Taxonomy, which was founded in 1951. Any person or organization may become a member of the Society on payment of dues. Annual membership dues for non-Japanese addresses are :  
Regular Members ..... US \$30.00  
Organization ..... US \$50.00
