2005 Fiscal Year Final Research Report Summary

Fundamental Researches for a Development of Empowerment Scale for self-management skills of diabetic patients in Community Nursing

Research Project

Project/Area Number

15592309

Research Category

Grant-in-Aid for Scientific Research (C)

Allocation Type

Single-year Grants

Section

一般

Research Field

Community health/Gerontological nursing

Research Institution

Kanazawa University

Principal Investigator

ODA Hatsue Kanazawa University, Graduate School of Medical Science, lecturer, 医学系研究科, 講師 (10303281)

Project Period (FY)

2003 - 2005

Keywords

Empowerment / Diabetes mellitus / Community nursing / Qualitative research / Self-care / Life style / Health Education

Research Abstract

This study ultimately aims to develop measures to empower and enrich the lives of diabetic patients within their communities. The purpose of this study is to qualitatively examine diabetic patients' awareness of their ability to control diabetes. The results of these two main studies are stated below.

1. Using a qualitative research for the improvement of diabetic patients' living conditions through their periodical health checkup.

The psychological factors which patients, who are suspected of having diabetes on the periodical health checkup, experienced when they actively improved their living conditions are examined in this study. As a result, the following five categories have been created ; (1) promoting diabetes awareness to allay fear of complications arising from diabetes, (2) developing an awareness of diabetes in self management performance, (3) creating a practical awareness of diabetes for the improvement of living conditions, (4) using awareness of diabetes to actively contro ...▼ More
