1993 Fiscal Year Final Research Report Summary

Medico-Legal Study on the Systematic and Microscopic Procedure for Wound Examination

Research Project

Project/Area Number

04454229

Research Category

Grant-in-Aid for General Scientific Research (B)

Allocation Type

Single-year Grants

Research Field

Legal medicine

Research Institution

Kanazawa University

Principal Investigator

OHSHIMA Tohru Dept.of Legal Med., Kanazawa Univ.School of Med., Professor, 医学部, 教授 (40183024)

Co-Investigator(Kenkyū-buntansha)

KWON Imhwa Dept.of Legal Med., Kanazawa Univ.School of Med., Instructor, 医学部, 助手 (70251923)
TAKAYASU Tatsunori Dept.of Legal Med., Kanazawa Univ.School of Med., Assoc.Professor, 医学部, 助教授 (80154912)

Project Period (FY)

1992 – 1993

Keywords

Forensic Pathology / Wound examination / Operation microscope / Vital reactions / Immunohistochemistry / Wound age / Interleukin-1

Research Abstract

Wound examination is of prime importance in forensic pathology, and forensic pathologists are often required to assess how a wound was made and with which type of weapon. Furthermore, like the time of death, it is always main problem at autopsy to determine objectively whether a wound was

ante-mortem or post-mortem, and if ante-mortem, how long before death it had been sustained. The purpose of this study is establishment of a microscopic and systematic procedure for wound examination in order to detect and record wounds of various kinds, and also to estimate skin wound age more accurately and objectively.
1.Medico-legal study on the microscopic wound examination procedure
Human skin wounds were microscopically observed by the use of a binocular operation microscope in forensic autopsy cases. In result, wound examination using the operation microscope is particularly useful in the determination of the direction of impact in abrasions, differentiation between lacerations and incised wound ⋯▾ More
