

# CONTENTS

## SCIENTIFIC REPORTS

### Department of Molecular Biology

General Summary . . . . .	1
---------------------------	---

#### Abstracts

(1) A transforming gene from a human primary stomach cancer. . . . .	2
(2) Amplification of c-oncogenes in human stomach cancer. . . . .	4
(3) Suppression of tumorigenicity in PCC4-azal teratocarcinoma without antigenic alteration. . . . .	6
(4) Studies on U series small nuclear ribonucleoprotein particles from mouse teratocarcinoma cells. . . . .	8
(5) Asymmetric development in chick embryonic gonads. . . . .	9
(6) Partial simulation of physiological constraints on tumor growth by in vitro culture. . . . .	10
(7) Amino acid assessment of transformed and non-transformed cell multiplication in vitro. . . . .	12

### Department of Virology

General Summary . . . . .	13
---------------------------	----

#### Abstracts

(1) Growth characteristics of Paramyxovirus: HVJ (Sendai Virus) wild type in neural tumor cells—Host-dependent temperature-sensitivity and release inhibition by papaverine, an inhibitor of cAMP phosphodiesterase. . . . .	15
(2) Restricted synthesis of membrane (M) protein and fusion (F) protein of Paramyxovirus: Measles Virus (MV) at elevated temperature (39°C)—Possible etiological role in the establishment of MV persistence in the acute infection. . . . .	16
(3) Studies on cellular function(s) required for replication of Human Cytomegalovirus (HCMV). . . . .	17
(4) Interaction of Human Cytomegalovirus (HCMV) with cells of nonhuman origin. . . . .	18
(5) Establishment and characterization of in vitro Human Cytomegalovirus (HCMV) latency models. . . . .	19
(6) Human Cytomegalovirus (HCMV) persistent infection in a human central nervous system cell line: Production of a variant virus with different growth characteristics. . . . .	20
(7) Heterogeneity and DNA analysis of Epstein-Barr Virus (EBV) derived from a nasopharyngeal carcinoma (NPC) epithelial hybrid cell line. . . . .	21
(8) Establishment of superinfection in epithelial hybrid cells (D98/HR-1, NPC-KT and A2L/AH) with Epstein-Barr Virus (EBV) and its relationship to the C3d receptor as a proposed EBV receptor. . . . .	22

## Department of Molecular Immunology

General Summary . . . . .	23
---------------------------	----

### Abstracts

(1) An atypical t(12;15) translocation of chromosomes found in murine plasmacytomas and activation of the <i>c-myc</i> oncogene. . . . .	26
(2) Analysis of the chromosomal abnormalities of a woodchuck hepatocellular carcinoma-derived cell line (WH257 GE10). . . . .	28
(3) Diverse expression of mouse serum amyloid A (SAA) genes during acute phase reaction. . . . .	29
(4) Duplication of serum amyloid A genes associated with increased gene expression in wild mice. . . . .	30
(5) Structure of mouse serum amyloid A genes: evolutionary implications. . . . .	31
(6) Specific deposition of serum amyloid A 2 protein in the mouse. . . . .	32
(7) Amyloid fibril formation by polymerization of abnormal transthyretin. . . . .	33

## Department of Biophysics

General Summary . . . . .	35
---------------------------	----

### Abstracts

(1) Isolation of human endogenous retrovirus genomes. . . . .	36
(2) The search of genes concerned with leukemogenesis by HTLV-I. . . . .	37
(3) Stable maintenance of integrated woodchuck hepatitis virus (WHV) DNA during establishment of a cell line of woodchuck hepatoma. . . . .	38
(4) WHV DNA integration in multicentric primary hepatocellular carcinomas of woodchucks. . . . .	39
(5) A novel family of short interspersed repetitive sequence found in the vicinity of an integration site of WHV DNA in a hepatoma-derived cell line of woodchuck. . . . .	40
(6) Transcriptional activity of a chromosome region where a WHV subgenome integrated in an established cell line of woodchuck hepatoma. . . . .	41
(7) Expression of the product of X ORF of woodchuck hepatitis virus (WHV) genome in <i>Escherichia coli</i> . . . . .	42
(8) Expression of PreC-C and C of human hepatitis B virus (HBV) and woodchuck hepatitis virus (WHV) in HeLa cells. . . . .	43
(9) Binding of nuclear factors to the WHV enhancer. . . . .	44

## Department of Immunobiology

General Summary . . . . .	45
---------------------------	----

### Abstracts

(1) Complete nucleotide and derived amino acid sequences of the fourth component of mouse complement (C4). . . . .	46
--	----

(2) Complete nucleotide and derived amino acid sequences of sex-limited protein (Slp), nonfunctional isotype of the fourth component of mouse complement (C4). . . . .	47
(3) Identification of the 5'-flanking regulatory region responsible for the difference in transcriptional control between mouse complement C4 and Slp genes. . . . .	48
(4) Recombination of two homologous MHC class III genes of the mouse (C4 and Slp) that accounts for the loss of testosterone dependence of sex-limited protein expression. . . . .	49

## **Department of Pathophysiology**

General Summary . . . . .	51
---------------------------	----

### **Abstracts**

(1) Human carcinoma-associated or -specific antigens capable of binding epidermal growth factor, transforming growth factor and/or insulin with tyrosine-specific phosphokinase activity. . . . .	52
(2) A tumor-specific antigen in human Wilms' tumor. . . . .	53
(3) Purification and characterization of a tumor-specific surface antigen in murine ascites hepatoma AH7974. . . . .	54
(4) An antigen highly associated with human gastric adenocarcinoma. . . . .	55
(5) Monoclonal antibodies against human renal cell carcinoma. . . . .	56
(6) Monoclonal antibodies against human thyroid cancer. . . . .	57
(7) Isolation of gene coding human thyroid carcinoma associated antigen and production of the antigen in <i>E. coli</i> . . . . .	59
(8) Mouse monoclonal antibodies with restricted specificity for human renal cell carcinoma and ability to modulate the tumor cell growth in vitro. . . . .	61
(9) Two distinct epidermal growth factor-dependent transforming growth factors isolated from bovine colostrum. . . . .	62

General Summary (addendum) . . . . .	63
--------------------------------------	----

## **Department of Pharmacology**

General Summary . . . . .	65
---------------------------	----

### **Abstracts**

(1) Interaction of monoclonal antibodies with a neurite outgrowth factor from chicken gizzard extract. . . . .	66
(2) An 82kDa membrane protein that inhibits the activity of neurite outgrowth factor (NOF). . . . .	67
(3) A neurotrophic factor for cerebrocortical neurons from chicken cerebral extract. . . . .	68
(4) Multiple opsin mRNA species in bovine retina. . . . .	69
(5) Isolation of a novel photoreceptor specific clone (MEKA cDNA). . . . .	70
(6) Bradykinin-induced breakdown of phosphatidylinositol phosphate and accumulation of inositol trisphosphate in neuroblastoma x glioma hybrid NG108-15 cells. . . . .	71

- (7) Bradykinin-activated transmembrane signals are coupled via No or Ni to production of inositol 1,4,5-trisphosphate, a second messenger in NG108-15 neuroblastoma x glioma hybrid cells. . . . . 72
- (8) Two polyphosphatidylinositide metabolites control two K<sup>+</sup> currents in neuroblastoma x glioma hybrid NG108-15 cells. . . . . 73

**Department of Experimental Therapeutics**

General Summary . . . . . 75

**Abstracts**

- (1) Development of new anticancer drugs. . . . . 76
- (2) Development of a new experimental model for prediction of malignancy of tumors and clinical application of the chemosensitivity test with use of embryonated chicks. . . . . 78
- (3) Biosynthesis of interleukin-2 in human peripheral lymphocytes stimulated with OK-432. . . . . 81
- (4) Inhibition of a suppressor cell generation but facilitation of a helper cell appearance by mouse serum in culture. . . . . 82
- (5) Enhanced generation of OK-432-induced killer cells by interleukin 2. . . . . 83
- (6) Adoptive therapy of mice bearing tumors with OK-432-induced killer cells. . . . . 84
- (7) Generation of activated killer-like cells by OK-432-mediated production of interleukin 1, interleukin 2, and interferon- $\gamma$  *in vitro*. . . . . 85
- (8) Immunogenic potential of tumor cells after treatment with chemotherapeutic agents. . . . . 86

**Department of Internal Medicine**

General Summary . . . . . 87

**Abstracts**

- (1) Evaluation of serum novel  $\gamma$ -GTP isoenzyme in early diagnosis hepatocellular carcinoma. . . . . 89
- (2) Characterization of gamma-glutamyltranspeptidase from human pancreatic cancer. . . . . 90
- (3) Evaluation of plasma PIVKA-II assay in patients with hepatocellular carcinoma. . . . . 92
- (4) The analysis of tumor growth pattern by endoscopic ultrasonography in patients with depressed type of gastric cancer. . . . . 93
- (5) Clinical significance of the determination of salivary lactoferrin in Sjögren's syndrome. . . . . 94
- (6) Development of monoclonal antibody against human placental alkaline phosphatase. . . . . 95
- (7) Expression of various sialylated carbohydrate antigens in human malignant and non-malignant pancreatic tissue. . . . . 96
- (8) Significance of ST-439 assay in pancreatic juice for diagnosis of pancreatic malignancy: Comparison with CA 19-9 assay. . . . . 97

## Department of Surgery

General Summary . . . . .	99
---------------------------	----

### Abstracts

(1) Study on intramucosal infiltrating modes of two histological types of gastric microcarcinoma and their diagnostic ability. . . . .	100
(2) Growth patterns and prognosis in early gastric cancer with reference to the risk factors of recurrence. . . . .	101
(3) Gastric adenocarcinoma with endocrine differentiation. An immunohistochemical and immunoelectron microscopic study. . . . .	102
(4) Early gastric carcinoma in patients with a Billroth II partial gastrectomy. . . . .	103
(5) Desmoplastic reaction of gastric carcinoma. A light and electron microscopic immunohistochemical study by using collagen type-specific antibodies. . . . .	104
(6) An immunological study on tumoricidal activity of peripheral blood lymphocytes in patients with gastric cancer. . . . .	105
(7) An evaluation of the immune response induced by OK432 for gastric cancer. . . . .	106
(8) The growth rate of human esophageal carcinoma and its clinical significance. . . . .	107
(9) Chemosensitive difference between primary tumor and metastases of the same patient transplanted into nude mice. . . . .	108
(10) Antitumor effect of combination therapy with IFN- $\beta$ and MMC on xenotransplanted human colonic cancer into nude mice. . . . .	109
(11) Clinico-pathological study on multiple simultaneous cancer of the stomach. . . . .	110
(12) Preoperative induction chemotherapy for linitis plastica carcinoma of the stomach. . . . .	111
(13) A new therapeutic approach for peritoneal dissemination in patients with advanced gastric cancer. . . . .	112
CANCER RESEARCH INSTITUTE COLLOQUIUM . . . . .	113
RESEARCH CONFERENCES . . . . .	115
SPECIAL LECTURES GIVEN BY VISITING SCIENTISTS . . . . .	117
LIST OF PUBLICATIONS . . . . .	120
ORGANIZATION AND PERSONNEL . . . . .	140
