

# CONTENTS

## SCIENTIFIC REPORTS

### Department of Molecular Biology

General Summary	1
-----------------	---

#### Abstracts

(1) Transcription and regulation during germination of <i>Bacillus subtilis</i> spore. 1. Three phases of RNA synthesis.	4
(2) Transcription and regulation during germination of <i>Bacillus subtilis</i> spore. 2. Effects of various inhibitors on RNA synthesis.	6
(3) Diffusion chamber culture of a single cell from the embryoid body of teratocarcinoma of strain 129 mouse.	8
(4) Distinction of the embryonal state from the differentiated state by the diffusion chamber culture of EB-cells from mouse teratoma OTT6050.	10
(5) Induction of endogenous retrovirus from L-cell with 5-bromodeoxyuridine and cycloheximide.	12
(6) Asymmetric degeneration of chick embryonic female gonads.	13
(7) Postnatal developmental changes in microtubule protein of rat brain.	14
(8) Studies on the circular dichroism of polypeptides and proteins.	15

### Department of Virology

General Summary	17
-----------------	----

#### Abstracts

(9) Antigenic conversion of tumor cell membrane xenogenized by persistent infection with nononcogenic viruses (HVJ: Sendai virus or Rubella virus).	20
(10) Enhancing effect of persistent infection with Paramyxovirus (HVJ) as one expression of persist HVJ <sub>ts</sub> genomes on the formation of CPV (Cowpox virus) specific cell surface antigen.	21
(11) Effect of lytic or persistent infection with HVJ or Rubella virus on a possible activation or production of latent endogenous C type RNA virus.	22
(12) Epidemiologic studies on teratogenic effect of Rubella virus infection in pregnant women by measurement of Rubella variant virus antibodies.	23
(13) Regional high incidence of anencephaly and its epidemiologic and etiological observation from double infections with CMV (Cytomegalovirus) and Coxsackie B virus.	24

(14) Growth factor released from virus-transformed or virus persistently infected cells. . . . .	25
(15) Experimental studies on viral etiology of Epstein-Barr virus (EBV) in nasopharyngeal carcinoma (NPC): establishment of EBV infection in human epithelial cells derived from nasopharyngeal tissues. . . . .	26
(16) Effect of DNA (Adeno and EB) or RNA (HVJ, Rubella and Cocksackie) virus infection on sister chromatid exchange (SCE) and chromosomal aberrations in lymphblastoid cells from adenoid-tonsillar tissues. . . . .	27
(17) Studies on AVS (antiviral substances) found in the sera of liver diseases (hepatitis, cirrhosis, hepatoma etc.). . . . .	28
(18) Isolation and characterization of etiological viruses in respiratory diseases using cultured cells. . . . .	29

## Department of Molecular Immunology

General Summary . . . . .	31
---------------------------	----

### Abstracts

(19) Alteration of cell-surface antigenicity of the mouse plasmacytoma. Lack of correlation between synthesis of myeloma protein and alteration of surface antigen. . . . .	34
(20) Cell-surface major glycoprotein of BALB/c mouse plasmacytoma 58-8 cells. . . . .	35
(21) Cytotoxic T lymphocytes to murine plasmacytoma cells in allogeneic and syngeneic mice: H-2 antigens are essential in the induction and effector stages of cytotoxic T lymphocytes. . . . .	36
(22) Activation of macrophage in cell-mediated immunity: Production of specific macrophage arming factor and its role. . . . .	37
(23) Restricted heterogeneity in antibody response to LPS in mice. . . . .	38
(24) Age dependent level of 35 serum protein fractions in normal individuals from new born to 90 years old. . . . .	39
(25) Sex dependent level of 35 serum protein fractions in normal individuals and their changes by estrogen or androgen administration in human and in mice. . . . .	40
(26) Changes of thirty-nine serum protein components by surgical stress. . . . .	41
(27) Interaction of the cytolytic complex of complement (C5b-9) with the biological membrane: Influence of the proteolytic cleavage of C5b. . . . .	42

## Department of Biophysics

General Summary . . . . .	43
---------------------------	----

### Abstracts

(28) Two dimensional electrophoresis of DNA binding proteins. . . . .	45
(29) Structure of DNA in a DNA-protein complex containing replication origin markers and its location on the <i>Bacillus subtilis</i> chromosome. . . . .	47
(30) The arrangement of DNA sequence near the replication origin of the <i>Bacillus subtilis</i> chromosome. . . . .	49
(31) Proteins associated with the DNA located near the replication origin of the <i>Bacillus subtilis</i> chromosome. . . . .	50
(32) Formation of DNA-protein complex near the replication origin during spore germination of <i>Bacillus subtilis</i> . . . . .	51
(33) Sequential replication of DNA during S-phase of HeLa cells. . . . .	52
(34) Effect of antimetabolic drug, demecolcin, on the growth of <i>Saccharomyces cerevisiae</i> . . . . .	54
(35) Identification and partial purification of tubulin protein of <i>Saccharomyces cerevisiae</i> . . . . .	56

**Department of Immunobiology**

General Summary . . . . .	59
---------------------------	----

**Abstracts**

(36) Solubilization of immune complexes formed from tetanus toxoid and human antibody IgG by homologous complement. . . . .	61
(37) Genetic polymorphism of murine complement C3 controlled by a single codominant locus linked to the major histocompatibility complex. . . . .	62

**Department of Pathophysiology**

General Summary . . . . .	63
---------------------------	----

**Abstracts**

(38) Identification of tumor-specific antigen in the insoluble fraction of human nephroblastoma. . . . .	64
(39) Immunological detection of a tumor-specific antigen in the insoluble fraction of human transitional cell carcinoma. . . . .	65
(40) A tumor-specific antigen in the insoluble fraction of human renal cell carcinoma. . . . .	66
(41) Identification of tumor-specific antigen in the insoluble fractions of human adenocarcinoma and squamous cell carcinoma of the lung. . . . .	67
(42) Demonstration of a putative tumor-specific antigen in human pancreatic carcinoma by immunodiffusion. . . . .	68

## Department of Pharmacology

General Summary	69
-----------------	----

### Abstracts

(43) Lipid metabolism of lymphoid cells with special reference to their physiological functions. (1) The <i>in vitro</i> effect of adrenergic agents and related compounds on triglyceride levels of guinea-pig lymphoid cells.	70
(44) Lipid metabolism of lymphoid cells with special reference to their physiological functions. (2) High levels of free fatty acids and thier esters in lymphoid cells resistant to cortisone or cyclophosphamide.	71
(45) Lipid metabolism of lymphoid cells with special reference to their physiological functions. (3) Close correlation between levels of cholesterol and free fatty acids in lymphoid cells.	72
(46) Effect of strain differences on heat-susceptibility of L-asparaginase in the guinea pig.	73
General Summary (addendum)	74

## Department of Experimental Therapeutics

General Summary	77
-----------------	----

### Abstracts

(47) Chemoimmunotherapy with OK-432 in experimental tumor systems.	79
(48) Effect of OK-432 on immunization with mitomycin-C-treated L1210 cells.	81
(49) Antitumor and other biological properties of sub-cellular fractions from group A streptococcus.	83
(50) Effect of asterriquinone and its related compounds on transplantable murine tumors.	84
(51) Chelating agents as the candidates for anticancer drugs.	86
(52) Caffeine releases G <sub>2</sub> arrest caused by adriamycin.	87
(53) Studies on the streptococcal hemolysin formed in the presence of colistin.	89

## Department of Internal Medicine

General Summary	91
-----------------	----

### Abstracts

(54) Studies on protein-losing gastrography.	93
--	----

**Department of Surgery**

**General Summary . . . . . 95**

**Abstracts**

(55) Morphological observations on and viability of frozen isolated  
rat pancreatic L islets. . . . . 96

(56) Preserved pancreatic islets transplantation in diabetic rats. . . . . 97

(57) On the viability of L islet of perfused pancreas of rat  
cadaver. . . . . 99

(58) A histological study of colonic and rectal polyp and  
its relation to early cancer. . . . . 100

(59) Intestinal metaplasia of the gastric mucosa: a histological  
study of its distribution in early gastric carcinoma. . . . . 101

**SEMINARS AND RESEARCH CONFERENCES . . . . . 103**

**EXTENSION LECTURE . . . . . 105**

**LIST OF PUBLICATIONS . . . . . 106**

**ORGANIZATION AND PERSONNEL . . . . . 116**
