## The Distribution of *Rubus* in Japan

### — 1. Distribution Maps —

Naohiro NARUHASHI\* and Nobuo SATOMI\*\*

鳴橋直弘・里見信生：日本産キイチゴ属植物の分布 1. 分布図

The distribution of the species of *Rubus* is systematically important to understand the life of species in nature. One of the authors, N. NARUHASHI, is interested in the systematic problems of *Rubus*, and the other, N. SATOMI, has treated the diet of the birds including the seeds of *Rubus* species. The two authors arrived independently at the conclusion that it is worthful to present here the distribution maps for the species of *Rubus*. All the Japanese species of *Rubus* are treated here except for the hybrids and one species endemic to the Bonins.

The following maps were drawn chiefly based upon the materials kept in the following herbaria :

The Herbarium, Faculty of Agriculture, Hokkaido University,

The Herbarium, Tohoku University,

The Herbarium, Botanical Garden, Tohoku University,

The Herbarium, Yamagata University,

The Herbarium, Faculty of Education, Ibaraki University,

The Herbarium, Faculty of Science, University of Tokyo,

The Herbarium, National Science Museum,

The Herbarium, Kanagawa Prefectural Museum,

The Herbarium, Kanazawa University,

The Herbarium, Shinshu University,

The Herbarium, Kyoto University,

The Herbarium, Yamaguchi Prefectural Museum,

The Herbarium, Kumamoto University.

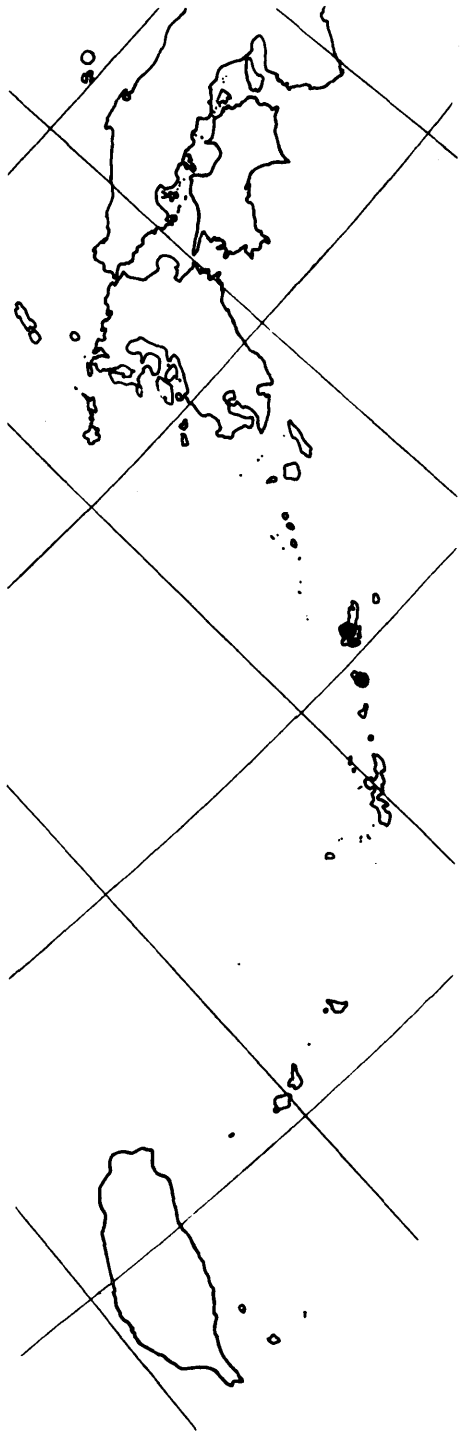

The Herbarium, Kagoshima University.

The authors wish to express their deepest appreciation to the curators mentioned above. Particular thanks are due to our colleagues who helped us to make the maps.
