表紙写真の説明：^{ツバ}鐔と植物文様

鐔は敵の刃から自分の拳を護るためのものであり、当初は実用本位の文様のない板鐔であったが、それに簡素な文様を毛彫するようになり、さらに進んで透彫が行われるように発展したと思われる。

それに用いられる文様は当然のことながら、使用する武士の嗜好があらわれ、鐔に見られる彫金技術は当時の工芸美術の粋が集約されていると言える。題材は各種各様、実に多彩であるが、ここでは私の所蔵品より植物を図案に取りあげた3面を紹介した。すなわち、Aは五三桐紋透鐔、Bは銀杏図鐔、Cは二葉葵透鐔である。

Instruction to Authors

1. "The Journal of Phytogeography and Taxonomy" publishes original papers, short communications, miscellaneous notes and book reviews concerning various fields of botanical sciences, including phytogeography, plant taxonomy, plant ecology, and palaeobotany. Short communications are short papers reporting new data that do not merit full paper. Miscellaneous notes are brief reports on observations, comments, alternative interpretations of previously published papers, mini reviews, etc.
2. It is recommended that contributors have membership in the Society.
3. Manuscripts submitted must contain important, new, unpublished material elsewhere. They have to be written in Japanese or English. The sequence of material in manuscript submitted should be: author's name, title of the paper, abstract (in English, limited in length to 250 words), a list of English key words (up to 5 words), the main text (introduction, materials and methods, results or observations, and discussion), and references. The title should be brief and characterize the main contents of the paper. The full names of the authors, the institute where the paper originated, and the exact address to which proofs should be sent must be given in the first page of the manuscript.
4. The manuscript should be typewritten in double space, with right and left margins of 25–30 mm. Legends of the illustrations and plates should be typewritten on a separate sheet.
5. Literature references should be listed at the end of the paper in alphabetical order under the first author's name. The following examples of presentation refer to (a) journal articles, (b) extracts from collective works, and (c) books:
 - (a) Sagisaka, S. and Anderson, E. 1965. Segmental interchanges of *Tradescantia*. *J. Heredity* **18**: 41–92.
 - (b) Stebbins, G. L. 1972. Ecological distribution of centers of major adaptive radiation in Angiosperms. In Valentine, D. H. (ed.): *Taxonomy, Phytogeography and Evolution*, pp. 7–38. Academic Press, London.
 - (c) Wettstein, R. 1935. *Plant Geography*. 540 pp. Springer-Verlag, Berlin.
6. Original papers must not normally exceed 10 printed pages, and 2 printed pages for short communications, including figures and tables. Extra charges (6,000 yen per page) will be asked for those exceeding 10 printed pages. Coloured illustrations can be published only if the additional cost is borne by the author.
7. Photographs and illustrations should be mounted on hard paper. They should be no longer than 216 × 297 mm. Illustrations will be reduced to a maximum of 150 mm or 70 mm in width and 190 mm in length. They must have the author's name and figure number on the back.
8. The manuscript with two copies should be sent to the Editorial Committee, Department of Biology, Faculty of Science, Kanazawa University, Kanazawa 920–11, Japan.
9. For each paper 50 offprints are supplied free of charge. Additional copies may be ordered at cost price: this must be done at the time when galley proofs are returned to the publisher.

Journal of Phytogeography and Taxonomy is published twice a year by the Society for the Study of Phytogeography and Taxonomy, which was founded in 1951. Any person or organization may become a member of the Society on payment of dues. Annual membership dues for non-Japanese addresses are:
