2000 Fiscal Year Final Research Report Summary

Study of Life Style and Life Consciousness in Contemporary Rural Japan

Research Project

Project/Area Number

09610313

Research Category

Grant-in-Aid for Scientific Research (C)

Allocation Type

Single-year Grants

Section

一般

Research Field

文化人類学(含民族学・民俗学)

Research Institution

kanazawa University

Principal Investigator

KANO Katsuhiko Faculty of Letters, kanazawa University Professor, 文学部, 教授 (00169591)

Co-Investigator(Kenkyū-buntansha)

UDAGAWA Taeko Faculty of Letters, kanazawa University Associate Prof., 文学部, 助教授 (90211771)

KAGAMI Haruya Faculty of Letters, kanazawa University Associate Prof., 文学部, 助教授 (20224339)

Project Period (FY)

1997 - 2000

Keywords

Rural Village / High Economic Growth / Concurrent Farmer / Life Style / Life Cycle / Aging / High Schooling / Under Population

Research Abstract

Purpose of the study is to make clear the changing process of life style and concionsress of contemposal rural Japan. Since later half of 1950s, life of rural Japanese changed fundamentally. These were rasions syteral causes of course, however intention and decision of people themselves were another important factors that oriented the direction of change. In the study, investigators made field researches at various types of settlements, such as farming, fishing, foresting and commerce ones. In spite of different characters and conditions of settlements, processes of change were rather common. That is, rate of highly educated people increased rapidly from later half of 1960s, and they left their original places to urban areas for jobs, and most of them didn't come back. De-population has become clear from the end of 1970s at every rural settlement and aging of population also proceeds. It is difficult to predict the future of these serial settlements, however it depend on the option of people who have left rural area.
